WORK EXPERIENCE

Flutter Frontend Developer (UI Specialist) | 2024-Present

Freelance/Personal Projects

- Designed and built high-fidelity UI prototypes for 3+ apps (TalkUp Chat App, Transport Management System, Todo App) using Flutter, focusing on responsive layouts and modern design principles.
- Leveraged GetX for efficient navigation and state management in UI workflows, improving development speed.
- Integrated Firebase Authentication and Firestore (for demo-ready UI flows) to showcase real-time functionality in prototypes.
- Shared clean, documented code on GitHub, receiving community feedback for best practices.

projects

- TalkUp Chat App (UI + Auth Prototype)
Implemented Firebase Authentication (Email/Google) and streamlined login flows.
Designed chat interface with real-time Firestore integration for message display.
- Transport Management System (UI Design)
Created Figma mockups and translated them into Flutter with responsive layouts.
Built dynamic admin dashboards using custom widgets and data grids.
- Todo App with Hive Database
Developed offline-first task manager using Hive for local storage, improving load speed by 35%.
Achieved 90% code reusability across platforms (Android).

AWARDS AND CERTIFICATION

OPP in C++ — Cisco — Feb 2024

Implemented classes, inheritance, and polymorphism in C++
Data Structures and Algorithms in C++ — Cisco — June 2024
Implemented common data structures like stacks, queues, and linked lists.
